Senior Android Engineer | Bengaluru | India

PROFESSIONAL SUMMARY

Senior Android Engineer with **6.5 years** across enterprise and startup environments — **5 apps shipped, 1M+ downloads**. Specialist in MVVM + Clean Architecture, ML-powered features (facial recognition, liveness detection), and leading cross-functional teams of **12 engineers** end to end.

TECHNICAL SKILLS

Core Android: Kotlin, Java, Jetpack Compose, MVVM, Clean Architecture, Coroutines, Flow

Jetpack & DI: Hilt, Dagger, ViewModel, LiveData, Room, WorkManager

Networking: Retrofit, OkHttp, REST APIs, JWT Auth

ML & Camera: MLKit, CameraX, Facial Recognition, Liveness Detection

Analytics: Firebase, Crashlytics, Mixpanel, Branch.io

Backend: Ruby on Rails, Sidekiq, MySQL, Redis, AWS Rekognition

Tools: Android Profiler, LeakCanary, Git

Exposure: Python, Node.js, React.js, CI/CD, Jenkins, Docker, AWS

WORK EXPERIENCE

Software Development Engineer (Android Lead) | Smartstaff, Bengaluru | Dec 2021 – Jan 2026

- Led end-to-end development and release of **3 production Android apps (100K+ downloads, 10K+ DAU, 25K+ peak users)** from architecture to production monitoring.
- Built **production-grade facial recognition & active liveness detection** (MLKit + AWS Rekognition) — used for real-time identity verification at production scale.
- Architected apps using MVVM and Clean Architecture with ViewModel, Coroutines, Hilt, and LiveData; integrated REST APIs via Retrofit and OkHttp with JWT-based authentication.
- Drove app stability to **98%+ crash-free rate** and **reduced launch time by 7%** using Android Profiler, LeakCanary, and Firebase Crashlytics.
- Designed a **reusable component library** (scratch cards, image cropping, custom views) that **cut feature development time by 30%+** across the team.
- Integrated Mixpanel analytics and Branch.io deep linking to support data-driven decisions across product and marketing teams.
- Contributed to backend (Ruby on Rails): built REST APIs for mobile features including async job pipelines (Sidekiq) and a facial recognition service via AWS Rekognition.

Software Development Engineer L3 (Android Lead) | Merkle Sokrati, Pune | Jul 2019 – Sep 2021

- Led Android development of **2 enterprise apps** (Java, MVC) — collectively reaching **1M+ downloads** on Google Play Store.
- Managed & mentored **12 engineers** across Android, Backend, AEM & QA — **lifted sprint commitment to 90%+** and **improved delivery predictability by 30%+**.
- Implemented end-to-end payment flow using **PayU SDK** — including checkout integration, card entry, OTP verification, and post-payment handling (success, failure, and retry flows).
- Reduced post-release defects by **~30%** by introducing structured code review processes and estimation frameworks.

EDUCATION

B. Tech. — Computer Science & Engineering | Manipal University Jaipur | 2015 - 2019 | CGPA: 8.08 / 10
