Senior Full Stack Engineer — Android & Backend

Bengaluru | India

PROFESSIONAL SUMMARY

Full Stack Engineer with 6.5 years building and shipping production Android systems backed by Ruby on Rails. Shipped **5 production apps across two companies — 3 at a Series A startup (100K+ downloads, 25K+ peak DAU) and 2 enterprise apps (1M+ downloads)** — while independently owning the full mobile-to-backend stack including REST APIs, async pipelines, and facial authentication systems.

TECHNICAL SKILLS

Android: Kotlin, Java, Jetpack Compose, MVVM, Clean Architecture, Hilt, Dagger, Coroutines, Flow, Retrofit, Room, CameraX, MLKit, WorkManager

Backend: Ruby on Rails, Sidekiq, REST APIs, MySQL, Redis, AWS Rekognition

Analytics: Firebase, Mixpanel, Branch.io, Crashlytics

Tools: Git, Android Profiler, LeakCanary, New Relic, Postman

Exposure: Python, Node.js, React.js, CI/CD, Jenkins, Docker, AWS

WORK EXPERIENCE

Software Development Engineer – Android, Backend | Smartstaff, Bengaluru | Dec 2021 – Jan 2026
Android

- Sole Android owner for 3 production apps — **100K+ downloads, 10K+ DAU, 25K+ peak users** — from architecture to production monitoring.
- Architected **MVVM + Clean Architecture** stack (Hilt, Coroutines, Retrofit, OkHttp, JWT auth) across all 3 apps independently.
- Built facial recognition + liveness detection (MLKit + AWS Rekognition) for real-time identity verification at production scale.
- Designed reusable component library (scratch cards, image cropping, custom views) — **cut feature dev time by 30%+**.
- Drove **98%+ crash-free rate** and **7% faster cold launch** via Android Profiler, LeakCanary, and Crashlytics.

Backend

- Designed and owned **40+ endpoint REST API layer** — defined contracts, enforced schema validation, maintained backward compatibility across app versions.
- Built Sidekiq async pipelines + notification monitoring system; cut **P95 latency ~30–40%** via Redis caching; **99%+ auth accuracy** via AWS Rekognition.

Software Development Engineer L3 — Android Lead | Merkle Sokrati, Pune | Jul 2019 – Sep 2021

- Led Android development of 2 enterprise apps (**1M+ combined downloads**) — owned architecture, delivery, and release planning.
- Managed **12 cross-functional engineers** — **raised sprint commitment to 90%+** and **improved delivery predictability by 30%+**.
- **Cut post-release defects by ~30%** via structured reviews and estimation frameworks; shipped end-to-end payment flow (PayU SDK).

EDUCATION

B.Tech. Computer Science & Engineering | Manipal University Jaipur | 2015 – 2019 | CGPA: 8.08 / 10
